

Otsar's Mini Day Camp

779 East 49th Street * Phone 718-946-7301 x 213 or 201

Day nine was mighty fine, as we got to explore the Hudson River Museum's Planetarium. It was so magical seeing an exciting planetarium show called Solar System Safari.

We got to meet Venus, Saturn and Mars in the journey to the planets that includes explanations of Pluto's dwarf planet status, the orbits of the planets and the phases of the moon and sun. It was an animated show, which made it really fun for us to understand all the neat things about our solar systems and different planets. We had a blast!

Back at camp we enjoyed our lunches and had a yummy snack that looked like telescopes which tied into our planetarium day...what a fun trip it was!
